Julian Mullins

Entrepreneur, Developer & Designer

Fascinated by the power of technology, I am an entrepreneur and a lover of learning

Experience

07/2016 - Present

Founder / Front-End Developer

Cortex Game

An addictively fun game that leverages scientific research to improve intelligence and working memory

- Coordinated a team of designers and back-end engineers to carry the product from idea to launch within 6 weeks (www.cortexgame.com)
- Held user experience (UX) and user interface (UI) design research sessions with early users, prioritized and implemented high priority features
- Architected and implemented front-end React.js application with client side routing
- Utilized responsive design features of CSS like Flexbox and media queries to create a seamless user experience across devices

10/2015 - Present

Director of Design & Website Development

TreadStone Studios

A brand management/digital design agency focused on small businesses

- Managed the company and client brand strategy through website and brand asset development, social-media marketing, SEO and data analytics
- Developed client websites using the Squarespace platform, custom CSS styling and vector graphic designs and wireframes using Adobe Illustrator
- Saved clients \$45,000+ in operating expenses while increasing client revenue by 25%

03/2017 - Present

Front-End Engineering Intern

Secmotic Innovation

A technology research & software engineering firm located in Sevilla, Spain

- Deployed a client website on Gitlab utilizing the MEAN stack (MongoDB, Express.js, AngularJS with Angular Material and Node.js)
- Iterated on the client's initial design proposal and styled the website with Sass
